Oxo-Biodegradable Products

Helping dental clinics make a difference to the environment at no extra cost

- Our plastic barriers & other disposables are made from a responsible and sustainable product.
- Our product uses a cost effective, oxo-biodegradable plastic. It is made of EPI (Environmental Products Inc.) 100% oxo-biodegradable material (ASTM 6954-04, EPI cert no. 3010508303).
- When discarded in soil in the presence of microorganisms, moisture and oxygen, it will biodegrade, decomposing into simple materials found in nature.
- The product is degradable to non-toxic end products within 1-2 years, when discarded in landfill (3-5 years for the harder plastic items). Traditional plastics take 100's–1,000's of years to break down.
- Our products have a shelf life of 2–5 years when stored in a cool dry environment.

Clear Disposable Cups

Product Code: **DC02** **\$2.53 /sleeve**
7 oz / 200 ml
Eco-Smart Biodegradable
50 per sleeve | 20 sleeves per carton

White Disposable Cups

Product Code: **DC03** **\$2.53 /sleeve**
7 oz / 200 ml
Eco-Smart Biodegradable
50 per sleeve | 20 sleeves per carton

Our biodegradable Disposable Cups are made from Eco-Smart® additive.

Like our EPI additive products Eco-Smart® additive allows the biodegradation of treated plastics placed in landfill to be accelerated by attracting microscopic organisms vital to the earth's ecosystem. Eco-Smart® creates an opportunity for microbes to use plastic as food.

Our range of toothbrushes can help you to reduce your environmental footprint

- The bristles contain charcoal reactive ion which can easily adsorb the dental plaque on the surface of teeth to make them healthy and white. They are more moisture proof and anti-bacterial than normal toothbrushes.
- Ultrafine ends of the charcoal enhanced bristles can go deep into the gaps between the teeth to ensure a deep clean.
- The soft charcoal enhanced bristles have super adsorption capacity which takes care of gums and protects them from injury while brushing.
- The bristles are made from a BPA FREE polymer resistant to microbial growth during normal use, to ensure safety and durability.
- The handle is made of MOSO Bamboo. Bamboo is part of the grass family which means no trees are cut down. MOSO Bamboo is one of the fastest growing bamboo varieties in the world, and Pandas don't like to eat it.
- When disposed of the handle will biodegrade within a couple of years.
- Available with customised labelling on the handle and package at no extra cost. Minimum order quantity applies.
- Receive 5% off toothbrushes when you order 10 or more pkts.
